How to run Python code on Google Colaboratory

Online virtual machine ↓

Step 1: Open https://colab.research.google.com/

Examples	Recent	Google Drive	GitHub	Upload

Filter notebooks

Title

CO Welcome To Colaboratory

Create a new notebook →

New notebook   Cancel
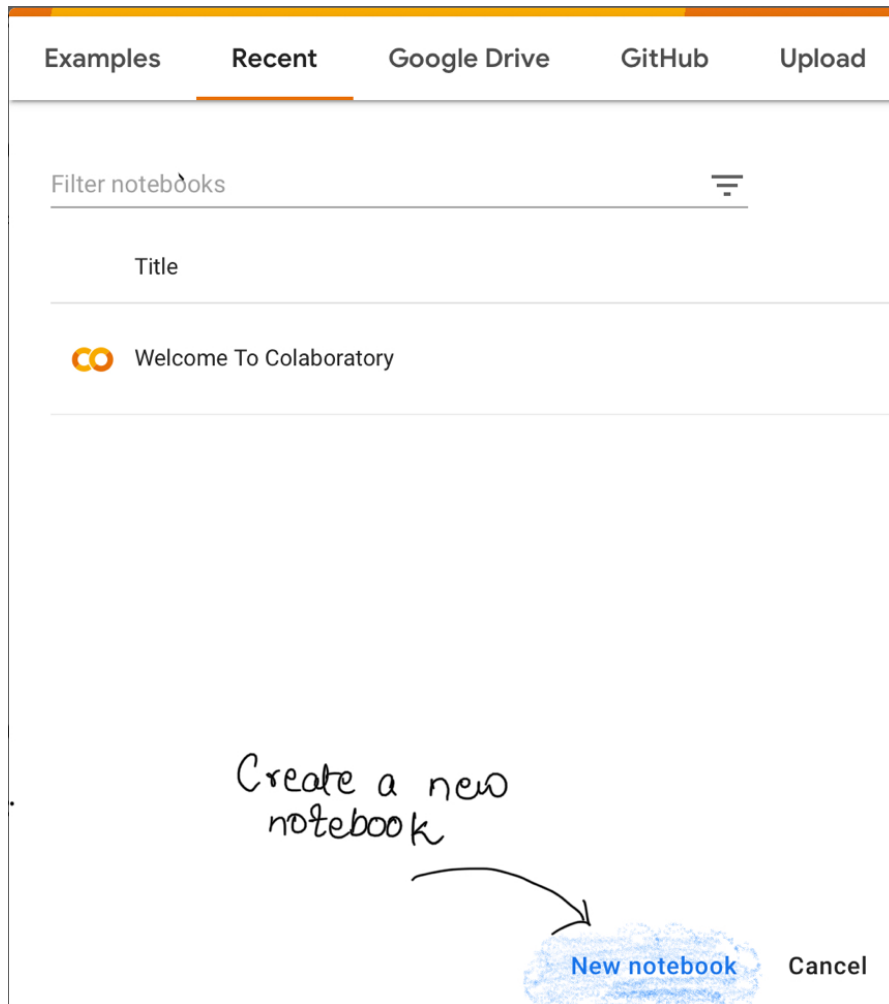

Step 2: Start Typing code into the code cells.

≡ Untitled28.ipynb → *You can rename your file.*

+ ‹› + T , *Run your code*
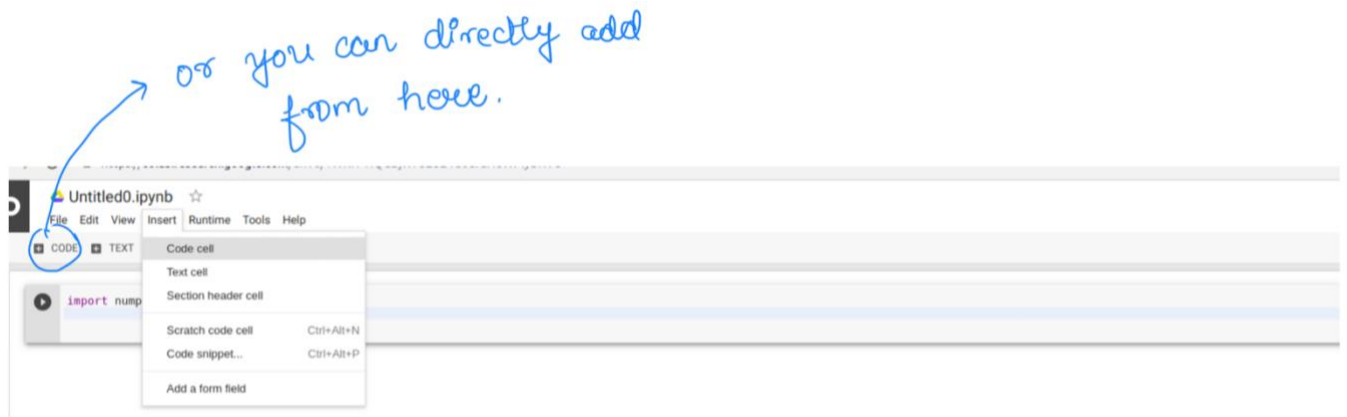

Start typing your code here

▶ 1 |
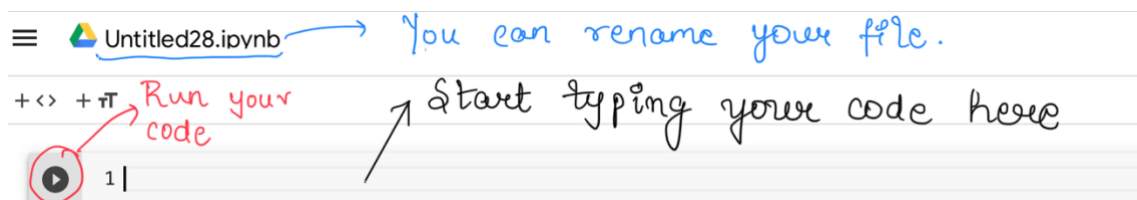

Import all necessary libraries first (If required)

Step 3: To add new cell, click on Insert->Code Cell

or you can directly add from here.

Step 4: To run a particular cell, select the cell and press Ctrl + ENTER keys.

or directly press run.

Our first progra

Hello woorld

Command :

print ("Hello woorld")

```
1 print("Hello world")
```

```
Hello world
```

Enjoy Coding 😊

Coding se karo Pyaare
'TA' ka na karo Intezaar
